1974-1976

Kaufman and Associates

Packaging and POP for Brown and Williamson Tobacco, and The Drackett Co. as a production artist

Producing mechanical artwork prior to the electronic revolution gives me the practical insight to build files that printers can use. I am MAC-based working in InDesign, QuarkXpress, Photoshop, Illustrator, and Dreamweaver. I am not a webmaster but work in Dreamweaver to build simple websites or complicated concepts.

I understand the importance of designing within budgets, and 35 years of meeting deadlines has been an important part of my success.

My first choice in photography is to use another professional. However, I do photography for my clients when high-end photography isn't practical—both studio and on location.

My website has samples of my work, plus I can send pdfs or printed samples if needed.
